Date: 24.05.2021

**Additional Principal Chief Conservator of Forests**

Ministry of Environment, Forest & Climate Change

Regional Office (West Central Zone)

Ground Floor, East Wing, New Secretariat Building,

Civil Lines NAGPUR - 440001

**Sub: Half yearly Compliance Report of Environmental Clearance issued for Sangoda Limestone Mine located at Sangoda Village, Tq. Korpana, in Chandrapur Distt., in Maharashtra for the period of Oct 2020 to March 2021.**

**Ref: Environmental Clearance F. No. - J-11015/213/2006- IA. II(M), Date: 22<sup>nd</sup> May 2007**

Dear Sir,

With reference to the above subject, we would like to inform you that, Murli industries have Sangoda Limes Stone mines (ML area 154.70 Ha and production of 0.3 MTPA) located at village Sangoda, Tq. Korpana District – Chandrapur. In pursuant to the order dated April 05, 2017 of the National Company Law Tribunal, Mumbai Bench, Murli Industries Ltd (MIL) was admitted for corporate insolvency resolution process in accordance with Insolvency and Bankruptcy Code, 2016. The resolution plan (“Resolution Plan”) of Dalmia Cement Bharat Ltd (DCBL) has been approved by the Committee of Creditors of MIL on December 20, 2017, the National Company Law Tribunal, Mumbai Bench vide its order(s) dated July 03, 2019, July 22, 2019 and July 25, 2019 and by the National Company Law Appellate Tribunal vide its order dated January 24, 2020. Pursuant to implementation of the Resolution Plan, MIL has become a subsidiary of DCBL from September 10, 2020 and DCBL will continue to operate the plant by the name of Murli Industries Ltd. Sangoda Lime Stone mines of MIL is not being operational since December 2013. Revival of mines is under progress and it was not in operation during Compliance period (Oct 2020 to March 2021).

**MURLI INDUSTRIES LIMITED**

*Registered Office: Block No. 802, A Wing, 8<sup>th</sup> Floor, Shreeram Shyam Towers, Kingsway, Civil Lines, Nagpur 440 001, India*

*CIN: U01110MH1991PLC064271*

*A Dalmia Bharat Group Company, www.dalmiabharat.com*

Further, with respect to the subjected matter, we are submitting herewith the point wise half yearly compliance of above referred Environmental Clearance for the period from **Oct, 2020 to March, 2021.**

Submitted for your kind information please.

Thanking you

Yours Faithfully,

For **Murli Industries Ltd.**

## ENVIRONMENTAL CLEARANCE COMPLIANCE REPORT

**Ref: Environmental Clearance : Environment Clearance No. - J-11015/213/2006- IA. II(M), Date: 22<sup>nd</sup> May 2007**

**Name of the Industry : Sangoda Lime Stone Mines, Murli Agro Product Ltd.**

**EC Details – Environmental Clearance for Sangoda Limestone Mine at Tq. Korpana , in Chandrapur Distt., in Maharashtra.**

**Compliance Period - October 2021 to March 2021**

**Compliance Report –**

**Note:**

Sangoda Lime Stone mine is currently not under operation. Pursuant to the order dated April 05, 2017 of the National Company Law Tribunal, Mumbai Bench, Murli Industries Ltd (MIL) was admitted for corporate insolvency resolution process in accordance with Insolvency and Bankruptcy Code, 2016. The resolution plan (“Resolution Plan”) of Dalmia Cement Bharat Ltd (DCBL) has been approved by the Committee of Creditors of MIL on December 20, 2017, the National Company Law Tribunal, Mumbai Bench vide its order(s) dated July 03, 2019, July 22, 2019 and July 25, 2019 and by the National Company Law Appellate Tribunal vide its order dated January 24, 2020. Pursuant to implementation of the Resolution Plan, MIL has become a subsidiary of DCBL from September 10, 2020. Sangoda mines is not being operational since December 2013. Revival of Mines is under progress

### **A. Specific Conditions –**

(i)	Topsoil, should be stacked properly with proper slope at ear marked site (s) with adequate measures and should be used for reclamation and rehabilitation of mined out area	Presently mine in not under operation. Condition will be complied with the start of mining operations.
(ii)	External OB dumps and other wastes should be stacked at earmarked sites only and should not be kept active for long period till its use for backfilling. Toe walls around the waste dumps shall be made to ensure and to prevent erosion and surface runoff. The total height of the dumps shall not exceed 30 m, each stage should preferably be of 10 m. Overall slope of the dump shall not exceed 28°. The OB dumps should be scientifically vegetated with suitable native species to prevent erosion and surface run off. In critical areas use of geo textiles shall be undertaken for stabilization of the dumps. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining. Compliance status should be submitted to the Ministry of Environment & Forests on six monthly basis.	The topsoil in the mining area striped and preserved along the mine lease boundary. Plantation will be carried out for its stability. The same top soil will be back filled for reclamation stage of mining. The height of the dump will be maintained below 30 m at 10 m stage. The slope of the dump will be maintain at 28°. Native species will be planted on the OB dump to prevent the soil erosion and surface runoff. Monitoring and management of the vegetation will be done till the vegetation become self-sustaining. The compliance status will be submitted to MoEF&CC along with half yearly compliance report.

(iii)	Catch drains and siltation ponds of appropriate size should be constructed to arrest silt and sediment flows from mine working. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains should be regularly desilted particularly after monsoon and maintained properly	We will complied as per the mining plan.
(iv)	Garland drain (size, gradient and length) shall be constructed for both mine pit and sump capacity should be designed keeping 50% safety margin over and above peak sudden rainfall (based on 50 years data) and maximum discharge in the area adjoining the mine site. Sump capacity should also provide adequate retention period to allow proper settling of silt material. Sedimentation pits should be constructed at the corners of the garland drains and desilted at regular intervals	Will be complied as per the mining plan.
(v)	Plantation shall be raised along the mine lease area including OB dumps which will be reclaimed by green belt / afforestation in consultation with the local DFO / Agriculture Department around mine lease area etc. The density of the trees should be around 2500 plants per ha.	The same will be complied as mining operations starts.
(vi)	The project authority should implement suitable conservation measures to augment ground water resources in the area in consultation with the Regional Director, Central Ground Water Board.	Ground water recharging structures will be constructed to enhance the ground water table in consultation with the Central Ground water Board, Nagpur.
(vii)	Drilling and blasting shall be by dust extractors and wet drilling.	Wet drilling method will be imparted for drilling
(viii)	Ground water table shall not be encountered during mining operations. Mine working will be restricted to above water table. Prior approval of MOEF shall be taken in case mining intersects ground water table.	We will not intersecting the ground water table during mines operation. Prior approval will be taken form MoEF&CC in case we intersects the ground water table.
(ix)	Regular monitoring of ground water level and quality should be carried out by establishing a network of existing wells and constructing new peizometers during the mining operation. The monitoring should be carried out two times in a year - pre-monsoon (April-May), post-monsoon (November) and the data thus collected may be sent regularly to MOEF, Central Ground Water Authority and Regional Director Central Ground water Board.	Regular monitoring will be conducted in and around mining lease area. Pre monsoon and post monsoon Ground water quality monitoring reports will be submitted to MoEF&CC, CGWA, Regional Director CGWB.
(x)	Existing ecological status of the project area shall be conserved and protected. The project proponent should take all possible precautionary measures during mining operation for conservation and protection of endangered fauna (Schedule-I), if any, spotted in the project area. Action plans for the same shall be prepared in consultation with wildlife department	Noted and will be complied

	along with allocation of funds for this purpose and shall be submitted to R.O. of the Ministry at Bhopal	
(xi)	Permission from the competent authority should be obtained for drawl of ground water if any, required for the project.	Noted and will be complied if required
(xii)	Suitable rainwater harvesting measures on long-term basis shall be planned and implemented in consultation with Regional Director, CGWB.	We will construct the rain water harvesting structured to recharge the ground water in consultation with CGWB, Nagpur.
(xiii)	An 50m barrier of shale between the ML area and the river shall be no mining zone. The barrier shall be afforested with plantation to prevent inundation of the area.	
(xiv)	The company shall engage an doctor, who is trained in occupational health surveillance.	Company has established the dispensary at the plant site with medical practitioner along with the nursing staff. Company ambulance is available to shift the casualty in case of serious condition. For occupational health and safety measures periodical health check up being carried out by medical practitioner.
(xv)	At the end of the mine life. The mined out area should be backfilled to the extent possible, levelled and reclaimed by plantations.	At the end of the mine life, the mined out area will be backfilled and reclaimed by plantation as per the mining plan.
(xvi)	Vehicular emissions should be kept under control and regularly monitored. Measures shall be taken for maintenance of vehicles used in mining operations and in transportation of mineral. The vehicles should be covered with a tarpaulin and shall not be overloaded	Only PUC certified vehicles will be used for mining excavation and transportation. Vehicles transporting ore will be covered through Tarpaulin to control dust emission.
(xvii)	The study report of socioeconomic profile including the cropping pattern for 38 villages in buffer zone shall be submitted within one year from the date of issue of environmental clearance and submitted to the Ministry of Environment & Forests.	Complied
(xviii)	Dimension of the retaining wall at the toe of dumps and OB benches within the mine to check run-off and siltation should be based on the rainfall data	The same will be complied as per the mining operations starts.
(xx)	Sewage treatment plant should be installed for the colony. ETP should also be provided for workshop and mineral separation plant wastewater.	Domestic sewage will treated through Septic tank and soak pit.
(xxi)	A Final Mine Closure Plan along with details of Corpus Fund should be submitted to the ministry of Environment & Forests 5 years in advance of final mine closure for approval.	The same will be complied as per the mining operations starts.

(xxii)	The company shall pay compensation to the land oustees as per the land Acquisition Act/ or as decided by the State Government	Complied
	<b>General conditions</b>	
(i)	No change in mining technology and scope of working shall be made without prior approval of the Ministry of Environment d Forests.	Noted and will be followed
(ii)	No change in the. calendar plan including excavation, quantum of mineral limestone ore and waste shall be made	Noted and will be followed
(iii)	Conservation measures for protection of flora and fauna, in the core & buffer zone shall be drawn up in consultation with the local forest and wildlife department	Noted and will be complied
(iv)	Four ambient air quality-monitoring stations shall be established in the core zone as well as in the buffer zone for RPM, SPM, SO <sub>2</sub> , NO <sub>x</sub> monitoring. Location of the stations should be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive targets and frequency of monitoring should be undertaken in consultation with the State Pollution Control Board	We will established four ambient air quality-monitoring stations in the core zone as well as in the buffer zone for RPM, SPM, SO <sub>2</sub> , NO <sub>x</sub> monitoring considering the metrological data in consultation with the MPCB.
(v)	Data on ambient air quality (RPM, SPM, SO <sub>2</sub> , NO <sub>x</sub> ) should be regularly submitted to the Ministry including its Regional office located at Bhopal and the State Pollution Control Board / Central Pollution Control Board once in six months	Half yearly Data on ambient air quality (RPM, SPM, SO <sub>2</sub> , NO <sub>x</sub> ) will be submitted to the Ministry, Regional office located at Nagpur and MPCB & CPCB once resumes the mines operation
(vi)	Fugitive dust emissions from all the sources shall be controlled regularly. Water spraying arrangement on haul roads, loading and unloading and at transfer points shall be provided and properly maintained.	Water sprinkling will be done at haul roads, loading and unloading points and material transfer points to control the dust emission.
(vii)	Measures shall be taken for control of noise levels below 85 d&A in the work environment. Workers engaged in operations of HEMM, etc. shall be provided with ear plugs / muffs.	We will take all the control measured to maintain the Noise Level below 85 dB in the work environment. Required PPE like ear plug and Ear muffs will be provided to the workmen engaged in the operation of HEMM.
(viii)	Industrial waste water (workshop and waste water from the mine) should be properly collected, treated so as to conform to the standards prescribed under &SR 422 (E) dated VP May, 1993 and 31' December, 1993 or as amended from time to time. Oil and grease trap shall be installed before discharge of workshop effluents.	The hazardous waste generated from the Mines operation will be dispose / recycles as per Hazardous and Other Waste management rule.
(ix)	Personnel working in dusty areas shall wear protective respiratory devices and they shall also be provided with adequate training and information on safety and health aspects.	Personal protective Equipments like Dust Mask will be provide to the worker working in the dusty area. Regular

		training will be imported for the workers for Health and safety awareness.
(x)	Occupational health surveillance program of the workers shall be undertaken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed.	For occupational health and safety measures periodical health check up being carried out by medical practitioner.
(xi)	A separate environmental management cell with suitable qualified personnel shall be set-up under the control of a Senior Executive, who will report directly to the Head of the Organization	A separate environmental management cell comprising of qualified and experienced staff is established under the control of Senior Executive who report to Unit head.
(xii)	The project authorities shall inform to the Regional Office located at Bhopal regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.	Complied
(xiii)	The funds earmarked for environmental protection measures shall be kept in separate account and should not be diverted for other purpose. Year wise expenditure shall be reported to the Ministry and its Regional Office located at Bhopal.	Year wise expenditure towards environmental protection will be submitted in six monthly compliance report. Fund earmarked for environmental protection measures will be kept in separate account.
(xiv)	The project authorities shall inform to the Regional Office located at Bhopal regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work	Complied
(xv)	The Regional Office of this Ministry located at Bhopal shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information / monitoring reports	Noted and we will extend full cooperation to the officials of Regional office during their visit.
(xvi)	A copy of clearance letter will be marked to concerned Panchayat / local NGO, if any, from whom suggestion / representation has been received while processing the proposal..	Complied
(xvii)	State Pollution Control Board should display a copy of the clearance letter at the Regional office, District Industry Centre and Collector's office/ Tehsildar's Office for 30 days	Complied
(xviii)	The project authorities should advertise at least n two local newspaper widely circulated, one of which shall be in the vernacular language of the locality concerned, within 7 days of the issue of the clearance letter informing that the letter has been accorded environmental clearance and a copy of the clearance letter is available with the State pollution Control Board and also at web site of	Complied

	the Ministry of Environment and Forests at- <a href="http://envfor.nic.in">http://envfor.nic.in</a> and a copy of the same shall be forwarded to the Regional Office of this Ministry located Bhopal.	
(xx)	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.	Noted
(XXI)	Failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986	Noted
(XXII)	The above conditions will be enforced inter-alia, under the provisions of the Water Prevention (Control of Pollution) Act, 1974, the Air (Prevention and Control of pollution) Act, 1981 the- Environment (Protection) Act, 1986 and the Public Liability insurance Act, 1991 along -with their amendments and rules.	Noted
