HERE'S WHY DALMIA DSP CEMENT IS KNOWN AS THE 'CONCRETE EXPERT': **////**

Dalmia DSP Cement is a specialised, best-in-class product that is formulated particularly for high-strength concrete applications – such as the foundation, columns, and slabs. As part of Dalmia cement portfolio, the product is a culmination of intensive R&D efforts, combined with over 8 decades of experience in trusted customer service and providing innovative solutions. At Dalmia, we have expertise in developing cement for special applications and demanding projects. And the same is applied when manufacturing Dalmia DSP Cement, making it an apt choice for the modern-day, fast-paced, and high-strength construction.

CONCRETE EXPERT

WHY CHOOSE DALMIA DSP CEMENT FOR YOUR HOME? **////**

ENGINEERED FOR HIGH-STRENGTH CONCRETE APPLICATIONS – FOUNDATION, COLUMNS, AND SLABS

Dalmia DSP Cement is crafted by grinding superior-strength clinker with high-purity gypsum and silica-rich slag or premium fly-ash – to offer high early and long-term strength gain. It has a unique blend of advantages, such as the high early strength of Ordinary Portland Cement and the sustained long-term strength gain of a blended cement, making it extremely suitable for all high-strength concrete applications.

CRACK AND CORROSION RESISTANT DURABLE CONSTRUCTION

The highly engineered particle-size distribution of Dalmia DSP Cement makes the concrete denser and impermeable, as compared to Ordinary Portland Cement. This helps in guarding against impending cracks and water leakage. Additionally, the reduced heat of hydration during setting, diminishes cracks and damages in the concrete. And effective chloride-binding provides better corrosion resistance to the embedded reinforcement in RCC, making it extremely durable for decades to come.

ASSURED ON-SITE EXPERT SUPERVISION

Get assured on-site expert supervision for every stage of construction by our team of civil engineers. This is a complementary service, aimed at providing technical assistance to monitor right construction practices for a strong and durable structure.

CERTIFIED WORLD'S GREENEST CEMENT

We have the lowest carbon footprint in the world and have been recognised as the 'World's Greenest Cement'.

SUPERIOR PACKAGING

Our tamper-proof, and water-resistant packaging ensures that the cement stays safe from any spillage or adulteration.

CORPORATE OFFICE

Dalmia Cement (Bharat) Limited, 11th and 12th Floor,

15, Barakhamba Road, New Delhi - 110001 | customercare@dalmiacement.com
